## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to the laser telescope, classified in class 359, subclass 399.
  - II. Claims 9-28, drawn to the laser amplifier, classified in class 359, subclass 333.
  - III. Claim 29-36, drawn to the method of laser shock peening, classified in class 219, subclass 121.85.
2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because when using a laser amplifier for amplifying in an entertainment laser, a vacuum chamber is not necessary because the intensity is below a certain threshold. The subcombination has separate utility such as use in an interferometer.

Art Unit: 3663

3. Inventions I/II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of invention III can be practiced by a semiconductor laser amplifier.

4. A telephone call was made to Mark Haynes on 9-29-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3663

**Conclusion**

6. The prior art which is cited but not relied upon is considered pertinent to applicant's disclosure.
